Checkout with Zalando

First redesign

Design flaws

- There need to be default or no size selected
- +/- is not looking good, doesn't feel "iOS"
- Hard to do changes from checkout screen
- Size selection path is pretty long
- Quantity is not needed on size selection, should be in Checkout, which makes things complex
- Will become even more complex with color selection

Redesign goals

Current goals

- Don't set quantity and color on start - most orders are rather 1 qt. and given color
- Don't add extra steps into the purchase flow
- Coherently present color, size and quantity selectors

Future goals

- Easily add color selection feature
- Easy edit of size, quantity, and color
- Remove items
- Add handling multiple items

1.0: Change size and quantity

K1X

GK 3000 LE MK3 - High-top
trainers - black

Schwarz

€41.21

Size: 44.5

Quantity: 1

Schwarz

€41.21

Size: 44.5

Quantity: 1

First view or size
tapped

No extra screen to select size - user opens checkout with size selection in place

Quantity tapped

Total sum of item updated
might not be necessary on
this stage (there's total
anyway in the chart)

Closed state

1.1: Change color

K1X

GK 3000 LE MK3 - High-top
trainers - black

€41.21

Size: 44.5

Schwarz

Quantity: 1

€41.21

Color selector

Presents color variants of the same model. Price could be optional, as Fashion App doesn't show it, but shows name of a color instead.

2.0: Multiple sizes, quantity, and colors

K1X

GK 3000 LE MK3 - High-top
trainers - black

€41.21

Size: 44.5

Schwarz

Quantity: 2

Single item state

K1X

GK 3000 LE MK3 - High-top trainers - black

Schwarz / 44.5 / 2
€41,21

Rot / 41.5 / 2
€33

€74,21

Multiple variants

Variants are scrollable
 horizontally

Change from 1 to N items
and back goes with
animation.

- **black** is only highlighted to emphasise missing model name without color

2.0: Multiple sizes - errors

Article out of stock

While you were playing with this fancy checkout interface, the items had sold to your worst enemy!

[Edit Order](#)

Variant out of stock

While checkout some items might become out of stock. User needs to place an order again without missing article. Missing article should be marked

List of items

The list seems the most complex, yet could be still easy to use, if versions will be perceived so, because it follows similar patterns and UI elements.
It's a list of controls used in former versions, actually with same or similar behaviours.
